

MASTERCLASS IN 3D/4D OBGYN ULTRASONOGRAPHY

By International Society of Ultrasound in Obstetrics and Gynecology

JANUARY 21 (Friday), 2022 – ONLINE

ISUOG APPROVED
COURSE

Highlights Of The Course

- Explanatory slides
- Descriptive videos
- Inter session discussions
- Sessions of query clearance
- In Depth Learning
- ISUOG Certification

COURSE FACULTY

Prof. Dr. Karim Kalache
QATAR

Dr. Karunakar Marikinti
UAE

Dr. Manjula Virmani
INDIA

COURSE CONTENTS

3D Multi-Planar Mode - Understand the key Concepts

Learning Objectives:

- Technical information about 3D Multi Planar Mode - How to set up the ultrasound Machine to acquire 3D Datasets
- Demonstration of clinical application for fetal scanning
- To learn how to use volume scanning to improve your scanning efficiency

Tips and tricks for 3D Surface Mode Rendering

Learning Objectives:

- Which knobs are essential to ensure optimal Imaging

- Understanding the basic principles related to Surface Mode
- To evaluate clinical situations where 3D surface mode scanning is helpful beyond the 2D examination

Practical 3D/4D Pelvic Scanning in Gynaecology and ART:

Learning Objectives:

- Clinical pelvic anatomy
- Accurate 2D Scanning
- Fundamental approach to 3D scanning of Pelvic Normal and Abnormal Anatomy
- Case scenarios 3D scanning
- Correlation of 2D to 3D scanning
- Correlation of 3D to MRI / Laparoscopic / Hysteroscopic Diagnosis

REGISTRATION / QUERIES

- ✉ info@aecsmed.com
- 🌐 www.aecsmed.com/registration
- ☎ +971 4 513 6400
- 📞 +971 50 439 8837 / +971 55 532 2030

COURSE FEE

AED 550 (USD 150)

Special discount will be offered for a group of doctors.
